| OneBlood                             | FL, GA, NC, SC (and additional locations)                                                     |
| LifeSouth<br>Community Blood Centers | AL, FL, GA (and additional locations)                                                         |
| The Blood Connection                 | GA, NC, SC                                                                                    |
| New York Blood Center                | NY, NJ (and additional locations)                                                             |
| Bloodworks Northwest                 | OR, WA                                                                                        |
| Carter BloodCare                     | TX                                                                                            |
| Gulf Coast Blood                     | TX (Gulf Coast region)                                                                        |
| South Texas Blood & Tissue           | TX (South Texas region)                                                                       |
| We Are Blood                         | TX (Central Texas)                                                                            |
| Our Blood Institute                  | OK                                                                                            |
| Blood Assurance                      | TN, KY                                                                                        |
| Arkansas Blood Institute             | AR                                                                                            |
| INOVA Blood Donor Services           | VA, DC (and additional locations)                                                             |
| Nebraska Community Blood Bank        | NE                                                                                            |
| Community Blood Center               | KS, MO (and additional locations)                                                             |
| Memorial Blood Centers               | MN                                                                                            |
| New England Blood Services           | ME, MA, NH, VT (and additional)                                                               |
| Rhode Island Blood Center            | RI                                                                                            |
| Blood Bank of Delmarva               | DE                                                                                            |
| Florida Blood Services               | FL                                                                                            |
| Blood Bank of Alaska                 | AK                                                                                            |
| Blood Bank of Hawaii                 | HI                                                                                            |
| ARUP Blood Services                  | UT (and additional locations)                                                                 |

### VERIFIED THERAPEUTIC PHLEBOTOMY / HH PROGRAMS

- Vitalant Therapeutic phlebotomy for hereditary hemochromatosis (HH). Can arrange more frequent collections with physician orders.
- Versiti Therapeutic phlebotomy program for HH (varies by location).
- OneBlood Therapeutic phlebotomy for HH (varies by location).
- LifeSouth Therapeutic phlebotomy for HH with physician orders. May use eligible HH blood for transfusion.
- The Blood Connection Therapeutic phlebotomy for HH (varies by location).
- Carter BloodCare HH program. Can use eligible HH blood for transfusion.
- Gulf Coast Blood Therapeutic phlebotomy for HH. FDA-approved to use eligible HH blood for transfusion.

### LEGEND

- Verified HH/Therapeutic Phlebotomy Program (may accept eligible HH blood for transfusion)
- Blood Center Network (blood donations accepted; therapeutic phlebotomy may be available — confirm with location)
- Additional Locations in State (not all locations shown)

### IMPORTANT INFORMATION

- Services vary by location.
- A physician's order is typically required for therapeutic phlebotomy.
- Not all blood centers offer therapeutic phlebotomy or accept HH blood for transfusion.
- Eligibility, frequency, and specific requirements may differ by location.
- Contact the blood center and your healthcare provider before treatment.

SERVICES VARY BY LOCATION — CONTACT THE BLOOD CENTER  
AND YOUR HEALTHCARE PROVIDER BEFORE TREATMENT.
